Art Unit: 1646

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-4, drawn to a method for identifying an organism comprising one or more

cells which are resistant to HIV infection, comprising detecting the polypeptide of

SEQ ID NO: 6 in a biological sample with an antibody, classified in class 435,

subclass 7.1.

II. Claims 5-9, drawn to a method for identifying an organism comprising one or more

cells which are resistant to HIV infection, comprising detectingthe presence of an

amplified nucleic acid product, classified in class 435, subclass 6.

2. The inventions are distinct, each from the other for the following reasons. Inventions

I-II are unrelated. Inventions are unrelated if it can be shown that they are not

disclosed as capable of use together and they have different modes of operation,

different functions, or different effects (MPEP §806.04, MPEP §808.01). In the

instant case, the different inventions are drawn to completely different methods

each having completely different method steps and using different compositions.

Invention I requires detecting the polypeptide of SEQ ID NO: 6 in a biological

sample with an antibody, whereas Invention II requires detecting the presence of an

amplified nucleic acid product. Each method is unique and not required another.

Thus, all the methods are exclusive.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for a single group is not required for any other group, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (l).

Advisory Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ruixiang Li whose telephone number is (571) 272-0875. The examiner can normally be reached on Monday through Friday from 8:30 am to 5:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda Brumback, can be reached on (571) 272-0961. The fax number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published Application/Control Number: 10/612,791

Art Unit: 1646

2,791 Page 4

applications may be obtained from either Private PAIR or Public PAIR. Status

information for unpublished applications is available through Private PAIR only. For

more information about the PAIR system, see http://pair-direct.uspto.gov. Should you

have questions on access to the Private PAIR system, please contact the Electronic

Business Center (EBC) at the toll-free phone number 866-217-9197.
